Course: Advance Programming

---

Create a Python program using a list and dictionary to store products with name and stock quantity. Display all products whose stock is less than 10.

```
C: > Users > kumar > .vscode > .vscode >  AP4.py > ...  
1  ∨ products = [  
2      {"name": "Pen", "stock": 15},  
3      {"name": "Notebook", "stock": 8},  
4      {"name": "Pencil", "stock": 5},  
5      {"name": "Eraser", "stock": 12},  
6      {"name": "Marker", "stock": 6}  
7  ]  
8  
9  print("Products with stock less than 10:\n")  
10  
11 ∨ for product in products:  
12 ∨     if product["stock"] < 10:  
13         print("Product:", product["name"])  
14         print("Stock:", product["stock"])  
15         print()  
16
```

## Output:

```
● PS C:\Users\kumar\AppData\Local\Programs\Microsoft VS Code>
Products with stock less than 10:

Product: Notebook
Stock: 8

Product: Pencil
Stock: 5

Product: Marker
Stock: 6
```
